Peritoneal Dialysis Simulator LF01027U Instruction Manual

Life/form® Products by Nasco

About the Simulator

This unique **Life/form**® Peritoneal Dialysis Simulator can provide the opportunity to practice and demonstrate all the procedures involved with peritoneal dialysis.

With a full capacity reservoir embedded inside the abdominal area, fluids can be introduced and emptied as they would be when treating a live patient.

Because extreme care and rigid procedures are so important in peritoneal dialysis, the opportunity provided by this simulator to get repeated and confirming practice can be very important.

Accurate, external anatomical detail is provided and ensured in this casting made from molds formed directly from a live volunteer.

NOTE: Original sponsorship for the development of this product was furnished by Abbott Labs.

Care and Cautions

1. Fluid Bags

The simulator uses an indwelling Tenckhoff catheter to allow the use of standard available fluid bags.

2. Use of Solutions

Do not use povidone-iodine prep solutions. These solutions will indelibly stain the simulator.

3. Cleaning

Most dirt and stains can easily be removed with a mild solution of Ivory® liquid soap and water. Most stubborn stains can be removed with Nasco Cleaner (LF09919U)

4. Adhesive Bandages

Most kinds of adhesive bandages can easily be used. Use only Glue-Off (LF01023U) for removing residual adhesive. Apply thin coat. Allow to dry. Rub off in a circular motion.

5. Stains

The soft vinyl "skin" stains easily. Avoid contact with newsprint or other printed surfaces.

6. Storage

When not in continuous use, it is recommended to store the simulator in the furnished storage case, or cover with a cloth or sheet of plastic.

Supplies/Replacement Parts for Peritoneal Dialysis Simulator

LF01023U	Glue-Off
