VAUSSIM

Versatile Advanced Ultrasound Simulator

Versatility
Transform every simulator into an Advanced Ultrasound Simulator.

Editor
Easily create your own casebook in order to create your exclusive and unique Simulator.

Multimedia Content
Display images, videos and volumes without restriction.

Mobility
View the instructor interface on any device with an internet browser.

VausSim™ is a Versatile Advanced Ultrasound Simulator, designed to make diagnosis during movement. The **VausSim™** ultrasound simulator, thanks to a network of high-fidelity sensors, give to the skin of any simulator or manikin an ultrasound feature also in mobile settings. This simulator allows the instructor to independently create, through the use of a powerful editor, a customized and exclusive casebook of real US images/videos/volumes without any additional cost.

Thanks to innovative technology, the simulator allows changing the pathological ultrasound status of the patient in real time during the scenarios.

VausSim™ is also completely independent and not sensitive to magnetic field rumors and guarantees continuous functioning despite the transportation and movement of the patient.

PACKAGES

The VausSim™ package includes:

- 3 Simulated Ultrasound Probes (1 linear, 1 convex, 1 phase array)
- 1 Reference System Module
- 20-pack RFID tags
- USB stick including VausSim software, lifetime license key, casebooks and user manual
- Emergency 1 module including n° 8 Emergency cases
- Emergency Covid 1 module including n° 1 COVID scenario
- IP67 certified and waterproof transport case
- Installation support and remote training
- Lifetime free software updates and upgrades
